

# FIBER PAD

YOUR PLASTIC SOLUTION FROM  
CONCEPT TO COMPLETION

**CERTIFIED**

**ISO 9001**

**AS 9100**

**CUSTOM PLASTIC THERMOFORMING AND ROTATIONAL MOLDING PRODUCTS**

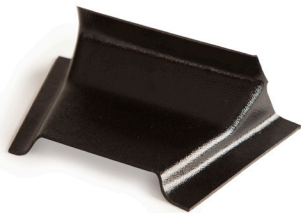

## SUPERIOR SERVICE FROM THE INDUSTRY EXPERTS

Our superior customer service stems from an understanding of manufacturing plastic solutions. We are able to provide our clients with the very best custom thermoforming and rotational molding options on the market today - offering shorter lead times, lower production costs, quicker tooling fabrication, and greater freedom of design.

### INDUSTRIES WE SERVE

- Aerospace & Aviation
- Agricultural
- Energy
- Fitness
- Industrial
- Marine
- Medical
- Recreational
- Transportation

### YOUR PLASTIC SOLUTION FROM CONCEPT TO COMPLETION

Fiber Pad, Inc. is centrally located in the United States and can ship easily to anywhere in North America. We specialize in tooling fabrication, part production, CNC trimming, and assembly to provide a custom fit for your part. With over 30 years of experience, our engineering and production teams will work closely with you to ensure your required specifications are achieved, from concept to completion.

## THERMOFORMING AND VACUUM FORMING

Thermoformed parts include:

- Dashes
- Panels
- Dividers
- Light covers
- Housings
- Liners
- Shrouds
- Trims
- Escutcheons
- Trays
- Louvers
- Much more

## ROTATIONAL MOLDING

Rotational parts include:

- Fuel tanks
- Storage drums
- Carts
- Containers
- Seats
- Bins
- Covers
- Cases

## MATERIALS EXPERIENCE

- ABS
- Acrylic
- HMWPE
- HDPE
- HIPS
- Kydex
- Lexan
- PEI
- PETG
- Pennite
- PVC
- Royalite
- TPO

*Benefits of thermoforming include:*

- Cost-effective production
- Small lead times
- Excellent price/quality ratio
- Freedom of design
- Small details can be added

*All products are custom formed and trimmed to exacting specifications to ensure a great fit during final assembly.*

*Benefits of rotational molding:*

- Design flexibility
- Low tooling cost
- Mold-in graphic
- Multilayered, seamless parts
- Reinforced walls
